Various Cardstock and Fundamentals

PLEASE NOTE:

To achieve some of the stamping looks depicted in the pictures provided, you will need to use various sponge dauber techniques. Below are explanations for three different sponge dauber techniques. When a particular technique is referenced in the instructions, refer to this page for step-by-step instructions.

Sponge Dauber Technique #1: Completely ink stamp in one color, and then use a dauber to apply different colors to edges or portions of the inked stamp.

Sponge Dauber Technique #2: Completely ink stamp in one color (lightest), and apply a second color $\frac{2}{3}$ of the way up from the bottom (medium). Then apply a third color $\frac{1}{3}$ of the way up from the bottom (darkest). This creates an ombre effect.

Sponge Dauber Technique #3: Rub dauber on stamp pad. Using a circular motion, rub off the majority of the ink onto a scratch piece of paper until you get a smooth, light, even color. To apply to project, rub the dauber gently in a circular motion, starting off the edge of the paper and gradually bringing the dauber onto the area to be inked. This should create a smooth, light, sponged look.
